

Exercise 6: Arithmetic Operators

Let's test your understanding of Arithmetic Operators.

We'll cover the following ^

- Problem Statement
- Sample Output
- Test Yourself

Problem Statement

Print the answer to the following equation using R language.

```
2 + 4 * 9 - 8
```

Use `cat()` to display your answer to the equation or the test case will not pass.

Sample Output

```
30
```

Test Yourself

Write your code in the given area. If you get stuck, you can look at the solution.

```
# Write your code here
cat(" ")
```

Let's have a look at the solution review.
