

# Quiz

Take a quiz on NumPy arrays to check your understanding.

## NumPy Quiz

Which command slicea all the elements of an array of size 6? Multiple options can be correct.

NumPy array size can be modified like a list.

3

```
import numpy as np
arr = np.array([[1,2,3],[4,5,6],[7,8,9]])
```

The command to slice the array to get `[[5,6] [8,9]]` would be?

4

```
import numpy as np

arr = np.arange(0,10,1)
new_arr = arr[1:7]
new_arr[:] = 100
```

What are the values in `arr`?
