

Quiz

Let's take a quiz and review some of the material we covered in this chapter.

1

Should you be upgrading your cluster with every new release?

2

How does applying smaller changes more frequently gives us more control?
(Multiple correct options)

3

What are the preferred strategies for upgrading Jenkins X? (Multiple correct options)

4

Backing up your cluster will help in the worst-case scenario and you will be able to restore the last known working state.

5

Which of the following task can be done using `jx upgrade ingress` ?

6

Using the default configuration, if we have a service called `backup-service` in a cluster accessible through the domain `play-with-jx.com` and deployed to the Namespace `staging`, then the application would be accessible through the address:
