

Exercise 1: Even or Odd

In this exercise, you are required to check whether the number is Even or Odd.

We'll cover the following ^

- Problem Statement

Problem Statement

Write a code which will check whether a given **integer** `number` is **even** or **odd**.

Hint: Think along the lines of using `if-else` condition.

Write your code below. It is recommended that you try solving the exercise yourself before viewing the solution.

Good Luck!

```
#include <iostream>
using namespace std;

int test(int number)
{
    int temp; //set temp to 0 if number is even
              //set temp to 1 if number is odd

    cout << "Computing whether " << number << " is an even or odd integer"<<endl;

    // write your code here

    return temp;
}
```
