

Quiz

Let's take a quiz and review some of the material we covered in this chapter.

Servers are not involved in serverless computing.

The task of creating and maintaining servers was removed with the emergence of cloud computing.

We can say that any application that can be packaged into a container image can run as a serverless deployment in Kubernetes.

Which of the following are drawback of traditional Jenkins? (Multiple correct options)

Tekton is incharge of _____.

Using Knative's scaling algorithm with default configurations, if we have 400 concurrent requests, then the system should scale to _____ replicas.

Why do we use serverless deployments with preview environments?

[Retake Quiz](#)

The next chapter will focus on the factors to consider while choosing the right deployment strategy.
