

# Chapter Quiz

In the following quiz, you will be tested on concepts you learned in this chapter.

There are two ways to call a method in Scala.

Which method call uses the infix notation?

How many built-in operators does Scala provide?

4

What is the difference between ordinary method calls and operator method calls?

5

Select the correct output for the following code:

```
val operand1 = 7
val operand2 = 3

println(operand1 / operand2)
```

6

Select the correct output for the following code:

```
val operand1 = 's'  
val operand2 = 'q'  
  
println(operand1 <= operand2)
```

7

Select the correct output for the following code:

```
val A = true  
val B = true  
val exp = A || B
```

```
println(false && exp)
```

8

Select the correct output for the following code:

```
val operand1 = 7
val operand2 = 3

println(operand1 & operand2)
```

9

Select the correct output for the following code:

```
var operand1 = 7  
var operand2 = 3  
operand1 += operand2  
  
println(operand1)
```

Which of the following is correct in terms of operator precedence?
