

Quiz

Let's take a quiz and review some of the material we learned in this chapter.

1

Which one of the following statements is a best practice regarding custom build packs?

2

For creating a custom build pack, in most cases, all we have to do is find the one that is closest to our needs, make a copy, and change a few files.

3

Why did we use the `probePath` value `/` instead of `/demo/hello?health=true` in our custom build pack?

4

What is the purpose of following command?

```
kubectl --namespace jx delete act \  
  --selector owner=$GH_USER \  
  --selector sourcerepository=go-demo-6
```

5

Which of the following is a valid reason not to contribute your custom build pack to the community?
