

Chapter Quiz

In the following quiz, you will be tested on concepts you learned in this chapter.

Which of the following are optional when defining a basic function?

Is the below function declaration using named parameters or positional parameters?

```
String param(String a, int b, [num c]) {  
  }  
  ..
```

What does it mean for a function to be treated as a first-class value?

The code snippets below are anonymous functions which return the product of two numbers. Which of the following is the correct implementation?

What is *syntactic sugar*?

[Retake Quiz](#)

In the next chapter we will learn about classes and jump into object-oriented programming.
