

Test Your Knowledge 3

Let's take a small quiz!

We'll cover the following

- Quiz on R Operators and Notation

Quiz on R Operators and Notation

This Quiz will take maximum 10 minutes.

An operator is a data structure.

Arithmetic operators are used for carrying out mathematical operations.

3

The output of performing arithmetic operations on vectors is an integer.

4

In R language, arithmetic operations on the following two vectors will not throw any warning.

```
vector1 -> c(0, 9, 1)
vector2 -> c(3, 4, 4, 5, 6, 7)
```

5

The symbol %/% is used for finding modulus in R language.

6

What is the name of the following **relational operator**:

7

The `%in%` operator is used only on vectors.

8

The `%in%` operator does normal element-wise execution on vectors.

9

In R language the symbol `||` is used for Element-wise Logical Or.

Logical operators are used for carrying out Boolean operations.

[Retake Quiz](#)

In the next chapter, we will be learning about Conditional Statements in R.
