

# Clustering – Quiz 2

Here is a quiz on instance communication in a cluster.

Let's test your understanding of clustering.

How do instances in a cluster communicate with each other?

Why is persistent session storage needed in a cluster?

Which session replication mode should we choose when we need a consistent

Which session replication mode should we choose when we need a consistent session state across the cluster?

4

Which session replication mode should we choose when response latency is a priority in the cluster?

5

What is the need for achieving a consensus in a cluster?

What is true about the leader node in a cluster?
