

Quiz

Let's take a quiz and review some of the material we learned in this chapter.

GitOps is a way to do Continuous Delivery which assumes that Git is a single source of truth and changes to infrastructure or applications are made by pushing changes to Git, not by clicking buttons.

Which ones of the following are not GitOps commandments? (contains multiple correct options)

3

What are **Permanent** environments?

4

In the environments with promotion set to **Manual** the new releases will not be deployed through a pipeline. Instead, we'll need to decide which release will be deployed to production and when that should happen.

5

What does the following command do?

```
jx get env --promote Auto
```

What is the purpose of application-specific tests?

Unit tests fall under the _____ category.

What is the role of the **development** environment?

[Retake Quiz](#)

The next chapter will shed light on how we can improve and simplify the process of software development using DevPods in Jenkins X and more!
