

Quiz

Let's take a quiz and review some of the material we learned in this chapter.

1

Which element of the ChatOps process is Prow responsible for?

2

Lighthouse is an alternative to Prow.

3

What is the purpose of the *tide* activity in the checks.

4

In Jenkins X implementation, the `/approve` command approves a PR while the `/lgm` command provides a label that is used to gate merging.

5

The `size` label is assigned by the Prow plugin and it depends on the number of lines changed.

6

Can you approve your own PR using the `/approve` command?

Can we add additional Prow plugins that can modify the rules that govern the pull request process?

[Retake Quiz](#)

The next chapter focuses on the architecture of the pipeline extension model.
