

Quiz: Request Methods

In this lesson, your knowledge of automating various HTTP methods using RestAssured will be evaluated through a quiz.

HTTP Method request using RestAssured.

Which of the following options are correct?

(You can select multiple correct answers)

2

`response.getBody().prettyPrint()` , pretty printing is possible for `JSON` , `XML` and `HTML` formats?

3

Which method will contain the response status code?

Which of the following options are correct?

(You can select multiple correct answers)

Rest Assured uses a DSL based expression for writing tests.

That is all about various `HTTP` request methods. In the next lesson, we will learn about validating responses using `JSONPath`.
