

Summary

In this lesson, we will take a look at what you learned about Firebase Authentication by completing this section of the course.

We'll cover the following

- What You Learned

What You Learned

1. How to create users
2. How to sign in
3. How to sign out
4. How to reset passwords
5. Showing a user dashboard to authenticated users
6. Showing and hiding error messages
7. Showing and hiding success messages
8. Showing and hiding a loading visual

In the next section of this course, you will learn how to add and remove to-do items specific to the signed-in user. This is commonly referred to as user authorization.
