

# Quiz: API Automation using REST Assured

In this lesson, your knowledge of the basic concepts of API automation using REST Assured will be evaluated through a quiz.

## API Automation using REST Assured

What is `JSONPath` ?

What is `Hamcrest` Library?

What is `hasItem(..)` method in `Hamcrest` library?

What is the purpose of Serialization and Deserialization?

Select all the valid Specifications?

Specification is used to avoid duplicate request parameters and/or response expectations for different tests.

Select the valid ones.
