

Exercise 2: Strings

Let's test your understanding of strings.

We'll cover the following

- Problem Statement
 - Input
 - Output
 - Sample Input
 - Output
 - Test Yourself

Problem Statement

Print a string stored in a variable `testVariable` **thrice** by repeating the same string.

Use `cat()` to display text on the screen.

Input

A `testVariable` containing the **character string** being used.

Output

Print the string three times.

Sample Input

```
learning is fun and easy
```

Output

```
learning is fun and easy learning is fun and easy learning is fun and easy
```

Test Yourself

Write your code in the given area. If you get stuck, you can look at the solution.

Write your code here
cat(" ")

Hint 1 of 1

< Use rep() or replicate()! >

In the next lesson, we give a detailed overview of the solution to this exercise.
