

Quiz: API and Web Services

In this lesson, your knowledge of the basic concepts of API and the client-server model will be evaluated through a quiz.

Your API and client-server knowledge will be evaluated through this quiz.

1

What is a client in the context of the client-server architecture?

2

What is a Server in context of a client-server architecture?

What is an API?

Which one of these are the types of Web Services?

Now that, we are familiar with API and web services, it's time to learn about HTTP basics.
