

1.15 Build

It's time to build our app.

```
npm run build
```

If the build succeeds, the build folder will be created in our project directory and the following message will be displayed.

```
Creating an optimized production build...  
Compiled successfully.  
  
File sizes after gzip:  
  
50.27 KB  build/static/js/main.6dffa2a1.js  
1.91 KB   build/static/css/main.95f71678.css
```

Now our build is ready to be deployed.
