

# Exercises

This is a fun exercise on string manipulation. Check it out!

We'll cover the following

- Question

## Question #

Write code below to convert all the letters in the string `province` to Uppercase letters.

For example :

Input: `Quebec`

Output: `QUEBEC`

Hint: [Ascii Table](#).

Another hint. Check below:

 Hide Hint

```
#include <stdio.h>

int main(int argc, char *argv[])
{
    char c = 'a';
    printf("%c - 32 = %c\n", c, c-32);
    return 0;
}
```

```
#include <stdio.h>
```

```
char * toUpperCase(char * province)
{
    char * UpperCaseProvince;

    //Write your code here
    //You can either modify the province variable itself
    //or save your Upper Case Province in the new variable

    return UpperCaseProvince;
}
```
