

2.7 List State and Actions For Each Component

Refer to the entire component layout to create a list of states and actions for each component:

```
TeslaCar Container :  
    state : wheels  
    action : N/A  
  
TeslaStats Container :  
    state : carstats(array)  
    action : N/A  
  
TeslaSpeedCounter Container :  
    state : config.speed  
    action : SPEED_UP, SPEED_DOWN  
  
TeslaTempCounter Container :  
    state : config.temperature  
    action : TEMPERATURE_UP, TEMPERATURE_DOWN  
  
TeslaClimate Container :  
    state : config.climate  
    action : CHANGE_CLIMATE  
  
TeslaWheel Container :  
    state : config.wheel  
    action : CHANGE_WHEEL
```
