

# Database Quiz - Part 2

This lesson contains a quiz to test your understanding of different models of databases, eventual, strong consistency & CAP theorem.

Let's Test Your Understanding Of A Few Database Concepts

What does polyglot persistence mean?

What is the need for multi-model databases in web applications?

When is it ok for our application to be eventually consistent?

When is it not ok for our application to be eventually consistent?

According to the CAP Theorem, to ensure strong consistency in our system, when a few of the nodes go down, which option should we pick from below?
