

# Challenge: Avoiding Duplicates

Try to avoid showing duplicates searches.

We'll cover the following

- Task

## Task #

- (1) Do not show the current search as a button, only the five preceding searches.
- (2) Don't show duplicated searches. Searching twice for "React" shouldn't create two different buttons.
- (3) Set the SearchForm component's input field value with the last search term if one of the buttons is clicked.

## Hints

- Adapt the `getLastSearches` function for (1).
- Adapt the `getLastSearches` function for (2).
