Wrap up!

We will wrap up this course with a final note for our learners.

We'll cover the following ⌃

- Delete the resources first
- Final note

Delete the resources first

🔍 If you've followed along for the purposes of experimentation, now is a good time to delete all resources so that you won't continue to be charged. Delete the two root CloudFormation stacks, `awsbootstrap` and `awsbootstrap-setup`. Since CloudFormation won't delete non-empty S3 buckets, you'll have to separately delete the buckets that we created to hold our CodePipeline artifacts and CloudFormation templates.

Final note

Thank you for enrolling in this course! We hope that this course served its purpose for you and was made up to your expectations. If you have any comments, feedback, or suggestions for us, we would love to hear back from you! You can also explore other courses made by Educative.

Here is another course based on AWS Lambda specifically that we offer.

- Running Serverless Applications with AWS Lambda

If you want to see a course made on some particular topic or technology, you can reach out to us at `courses_feedback@educative.io>`, we will surely get back to you!

That pretty much sums it all. Team educative wishes you good luck for your future endeavors. Happy learning!
