Quiz

Test your knowledge of loops with this quiz!

1 Have a look at the `for` loop below:

```python
string_list = ["Anakin", "Luke", "Rey", "Leia", "Vader"]
for s in string_list:
    if len(s) < 5:
        print(len(s))
```

What will be the output on the terminal at the end of the loop?

2 In the following code, how would we replace the `for` loop with a `while` loop?

```python
string_list = ["Anakin", "Luke", "Rey", "Leia", "Vader"]
for s in string_list:
    if len(s) < 5:
        print(len(s))
```

3 A `while` loop runs as long as its condition holds `True`.

4 What is the purpose of the `break` statement?
