Solution Review 1: Display Output

This lesson gives a detailed solution review of the challenge in the previous lesson.

> **We'll cover the following** ⌃
>
> - Solution:
>   - Explanation

Solution:

```
fn test() {
    print!("I am learning Rust programming language");
}
```

Explanation

- On **line 2**, the statement "I am learning Rust programming language" is placed within the parentheses of the `print!` macro.

  The output `"I am learning Rust programming language"` gets printed on the console.

Up next is another coding challenge for you.
