Quiz 2

Solve this quiz to practice your concepts of arrays.

---

1 `array_unshift()` function

---

2 `array_push` function

---

3 What will be the output of the following code:

```php
<?php
$arr = array(2,4,5,9);
array_unshift($arr, 14, 15);
print_r($arr);
?>
```

4 What will be the output of the following code:

```php
<?php
$arr = array(2,4,5,9);
array_push($arr, 14, 15);
print_r($arr);
?>
```

5 What will be the output of the following code:

```php
<?php
$arr=array(1,3,5,7,9,11);
unset($arr[3]);
print_r($arr);
?>
```

6 What will be output of the following code:

```php
<?php
$numbers = array(-22, 4, 1, 20, 0, -44);
sort($numbers);
print_r($numbers);
?>
```
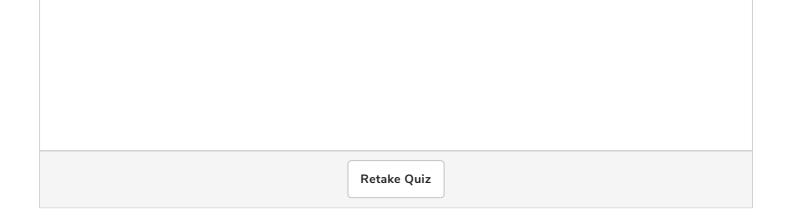

7 What will be the output of the following code:

```php
<?php
$numbers = array(-22, 4, 1, 20, 0,-44);
```

```php
ksort($numbers);

print_r($numbers);
?>
```

In the next chapter, you will learn about classes and inheritance.
