Exercise 8: if/else Statements

Let's test your ability to write if else statements.

Problem Statement

Given a number, print **foo** if the number is a multiple of 3, **bar** if it is a multiple of 5 and **foo bar** if it's a multiple of both 3 and 5.

> Use `cat()` to display your output.

Input

A `testVariable` containing the number being tested.

Output

The correct statement corresponding to the condition of the number.

Sample Input

```
45
```

Sample Output

```
foo bar
```

Test Yourself

Write your code in the given area. If you get stuck, you can look at the solution.

```
# Write your code here
cat(" ")
```

Let's have a look at the solution review of this exercise.
