Challenge 2: Declare a Tuple

In this challenge, you are required to make a tuple.

Problem Statement

- Declare a tuple, `persons`, of size 6 that has the names of a people along with their ages
- Print the value of `persons`

Output

The output of the code should be:

```
Alex:21, Abe:22, Anna:23
```

Coding Exercise

Write your code below. It is recommended that you try solving the exercise yourself before viewing the solution.

> **Note:** There is a `test` function given in the code for testing purposes. Do not modify it.

> **Important Note:** Use the dot operator (`.`) for accessing the values of the tuple. Do not use a debug trait.

Good luck!✌

```
fn test() {
    // Write code here!
}
```

Hint 1 of 2

Define a tuple

```
tuple_name = (val1, val2);
```

Let's move on to the detailed solution review in the next lesson.
