Introduction to Conditional Expression
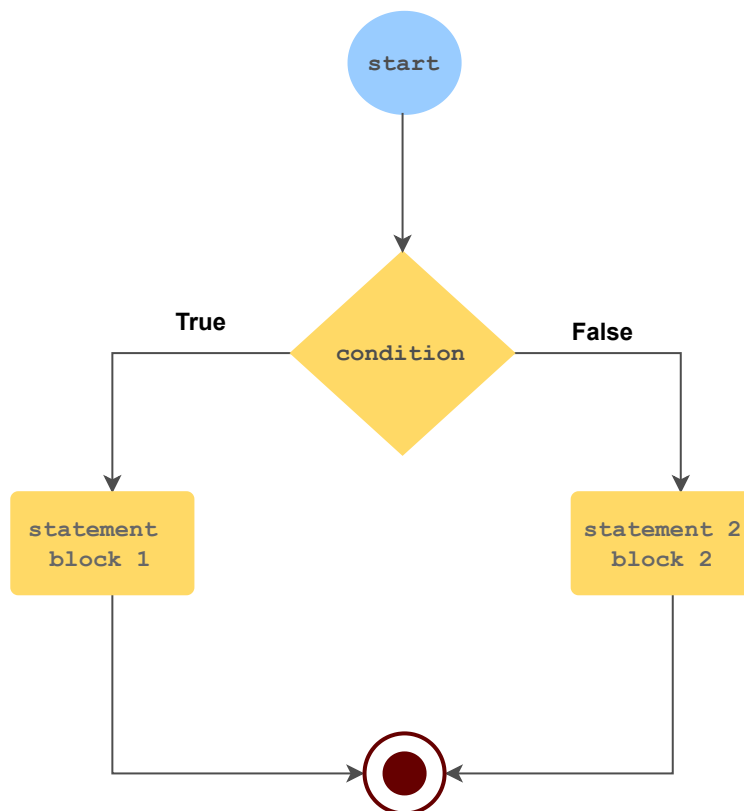

This lesson gets you acquainted with the conditional statements in Rust.

What Are Conditional Expression?

Conditions basically give the power to make decisions. They check the condition of the expression and act accordingly.

Types of Conditional Expression

There are three types of conditional expression in Rust:

1. `if` Expression

2. `if let` Expression

3. `match` Expression

In the next lesson, you'll learn about the "If Expression".
