Quiz

Quick quiz to test your understanding of strings in PHP.

1 Single characters can be extracted using array (square brace) syntax as well as curly brace syntax.

2 What will be the output of the following code?

```php
<?php
echo strpos("machinelearning", "learning");
?>
```

3 The substr_replace function changes the actual string.

**4** What will the following code print?

```php
<?php
$var1 = "Myname";
$var1 .= "is";
$var1 .=  "James";
echo $var1;
?>
```

Let's learn about arrays in the next chapter!
