Summary
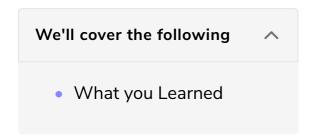

In this lesson, we will take a look at what you learned about Firebase Hosting by completing this section of the course.

We'll cover the following   ^

- What you Learned

What you Learned

1. How to install the Firebase CLI
2. How to initialize Firebase with the `firebase init` command
3. How to configure hosting options
4. How to deploy using the `firebase deploy` command

In the next section, you will learn how to give users the ability to upload videos, images, pdfs, or other files with the use of Firebase Storage.
