Uninstalling Jenkins X

In this lesson, we will go over the method to uninstall Jenkins X if it was installed in an existing Kubernetes cluster.

If you chose to install Jenkins X in an existing Kubernetes cluster, you can remove it with a single `jx uninstall` command.

```
jx uninstall \
   --context $(kubectl config current-context) \
   --batch-mode
```

In the next lesson, we will take a quiz and review some of the material we learned in this chapter.
