Quiz

Let's take a quiz and review some of the material we learned in this chapter.

1 Which simple command lets us import projects into Jenkins X?

2 Which one of the following is not a branch created by Jenkins X for the project?

3 Which flag do we use with `jx get activities` that lets us continuously observe the progress?

4 How did we add MongoDB chart to the one that we already had?

5 When your project has some of the files, but not all, the import process will generate only those that are missing.

The next chapter will deal with how we can create custom build packs.
